

Problem Statement Worksheet (Hypothesis Formation)

How much should you invest in movie production based on its release date?

H

1

Context

Movie creators try to profit off their movies. There are certain dates, expenses, and other factors that create a good return on investments in show business.

2

Criteria for success

Identifying what factors lead to a good movie box office profit.

3

Scope of solution space

Helping companies calculate the risk of loss of gains in profits when producing a movie.

4

Constraints within solution space

The data set contains older movies and not movies from streaming profits

5

Stakeholders to provide key insight

Production companies
Actors
Theaters

6

Key data sources

A movie database from Kaggle
